

Adding Integers: Exercises

Problem 1 Follow the steps below to find the sum.

$$-80 + (2)$$

Will the numbers join forces or battle?

Multiple Choice:

- (a) Join forces.
- (b) Battle. ✓

Problem 1.1 Find the absolute value (strength) of each number.

$$|-80| = 80 \qquad |2| = 2$$

Problem 1.1.1 How will you find the answer?

Multiple Choice:

- (a) Add the absolute values and write the answer with the common sign.
- (b) Add the absolute values and write the answer with the sign of the stronger number.
- (c) Subtract the absolute values and write the answer with the common sign.
- (d) Subtract the absolute values and write the answer with the sign of the stronger number. ✓

Problem 1.1.1.1 Which number is stronger (has larger absolute value)?

Multiple Choice:

Author(s): Kelly Stady

(a) 2

(b) -80 ✓

Answer: $-80 + 2 = -78$

Problem 2 Follow the steps below to find the sum.

$$-900 + (-75)$$

Will the numbers join forces or battle?

Multiple Choice:

(a) Battle.

(b) Join forces. ✓

Problem 2.1 Find the absolute value (strength) of each number.

$$|-900| = 900$$

$$|-75| = 75$$

Problem 2.1.1 How will you find the answer?

Multiple Choice:

(a) Add the absolute values and write the answer with the sign of the stronger number.

(b) Add the absolute values and write the answer with the common sign. ✓

(c) Subtract the absolute values and write the answer with the sign of the stronger number.

(d) Subtract the absolute values and write the answer with the common sign.

Problem 2.1.1.1 **Answer:** $-900 + (-75) = -975$
